Summary

Cloud & DevOps Engineer with 3+ years of experience designing and managing scalable cloud infrastructure across AWS, Azure, and GCP. Proficient in migrating on-premises workloads to cloud with zero downtime, building secure CI/CD pipelines, and containerizing applications using Docker and Kubernetes (EKS). Skilled in Infrastructure as Code (Terraform, CloudFormation), GitOps workflows, and full-stack observability with Prometheus and Grafana. Experienced in high-compliance environments including banking and enterprise IT, with hands-on expertise in IAM, Security Hub, GuardDuty, and regulatory frameworks (PIPEDA, GDPR).

Skills

Cloud Platforms Amazon Web Services (EC2, S3, VPC, RDS, IAM, CloudWatch, Route 53, Lambda, Systems Manager, Cost Explorer, Config), Microsoft Azure, Google Cloud Platform (IAM, Deployment Manager, Cloud Monitoring, Logging, Security Command Center)	Programming & Scripting Python, Java, JavaScript, SQL, C/C++, Bash/Shell, PowerShell
Databases PostgreSQL, MySQL, MongoDB	DevOps & CI/CD GitLab CI/CD, Jenkins, AWS CodePipeline, Argo CD, GitOps, SonarQube
Containerization & Orchestration Docker, Kubernetes (EKS), Helm	Infrastructure as Code (IaC) Terraform, AWS CDK, GCP Deployment Manager, Ansible
Security & Compliance AWS IAM, Security Hub, GCP IAM, Security Command Center, Trivy, PIPEDA, GDPR	Monitoring & Observability Prometheus, Grafana, AWS X-Ray, Kibana, Nagios
Tools & Methodologies Jira, Agile, Scrum	Operating Systems Linux (Ubuntu, CentOS), Windows

Experience

Cloud Engineer, IT Pros (End Client - IBM) Architected scalable AWS infrastructure (EC2, S3, RDS, VPC, IAM, Route 53) supporting active users, migrating 30+ on-premises applications to cloud with zero downtime. Developed reusable Terraform and CloudFormation modules to manage 85+ resources across environments, reducing infrastructure drift. Built CI/CD pipelines using Jenkins, AWS CodePipeline, and GitLab CI/CD with integrated SonarQube, Trivy, and SAST/DAST security gates. Containerized 12+ monolithic applications into microservices using Docker, deployed on Amazon EKS with Helm-based GitOps via ArgoCD. Automated infrastructure provisioning and cost optimization using Python and Bash with EventBridge scheduling. Enforced zero-downtime blue-green deployments via ALB and AWS CodeDeploy, implemented Secrets Manager rotation, IAM least-privilege policies, Security Hub, and GuardDuty maintaining PIPEDA and GDPR compliance. Established full-stack observability using Prometheus, Grafana, and CloudWatch for real-time performance monitoring. Administered PostgreSQL and MySQL on RDS with automated backups, failover, and Ansible-based configuration management across 5+ Linux and Windows servers.	08/2024 – Present
Java Full Stack Developer (Cloud Engineer), Aurionpro Solutions (HDFC, ICICI, AXIS Banking Projects) Spearheaded enterprise CI/CD pipeline design using Jenkins and GitHub Actions, automating deployments for large-scale banking applications and reducing deployment time by 70% through streamlined automation and cost optimization. Orchestrated DevOps toolchain governance integrating SonarQube quality gates, Trivy vulnerability scanning, Prometheus, and Grafana monitoring dashboards, reducing production defects by 30% and enabling proactive audit-ready operations. Automated end-to-end deployments from source control to Oracle WebLogic servers with rolling updates, health checks, and maintenance controls, sustaining 99.8% uptime across development and production environments. Streamlined artifact lifecycle management using Maven and Nexus Repository Manager, improving release governance, dependency controls, and reporting consistency across multiple development teams. Architected Spring Boot microservices handling 10,000+ daily transactions, reducing database load by 40% and improving response time by 60% using Redis caching, along with Oracle SQL optimization and Hibernate connection pooling boosting performance by 20%. Supported Agile delivery of remittance modules and CCIL integrations ensuring RBI regulatory compliance, governance controls, and seamless third-party API connectivity across banking workflows. Drove incident lifecycle management and production support operations by analyzing logs and monitoring dashboards, applying systematic troubleshooting practices to improve mean time to resolution and maintain audit compliance	01/2022 – 04/2024

Education

Postgraduate Certificate in Cyber Security, Durham College	01/2025 – 08/2025
Postgraduate Certificate in Cloud Computing, Durham College	05/2024 – 12/2024
Master of Computer Applications (MCA), Information Technology, Veermata Jijabai Technological Institute (VJTI)	01/2020 – 08/2022

PROJECTS

Cloud-Native Blogging Platform with Kubernetes Orchestration Built end-to-end CI/CD pipelines integrating Jenkins, GitHub Actions, Docker multi-stage builds, SonarQube quality gates, and Trivy security scans, enabling automated deployments to Kubernetes. Provisioned AWS EKS infrastructure with Terraform, enabling autoscaling, secure VPC networking, and IAM-based access control. Implemented GitOps workflows and Kubernetes autoscaling (HPA, ALB Ingress), achieving 99.9% uptime and handling 5x peak traffic spikes.	2024
